Research Interests

I am interested in human-computer interaction (HCI) and ubiquitous computing in the context of health technology. My goal is to design, build, deploy and evaluate novel systems using sensing and natural language processing (NLP) in physical, behavioral and mental health to improve wellbeing for underserved people.

Education

- 2019 - present *Ph.D. student, Information Science, Cornell University*
Advised by Deborah Estrin and Nicola Dell.
- 2017 - 2019 *M.S. Information Systems, Health Tech specialization, Cornell Tech* GPA: 3.9/4.0
Relevant coursework: Applied Machine Learning, Deep Learning, Natural Language Processing, Human-Computer Interaction, Interactive Device Design.
Advised by Deborah Estrin and Nicola Dell.
- 2010 - 2014 *B.A. Ecology & Evolutionary Biology, Princeton University* GPA: 3.5/4.0
Concentration in Global Health and Health Policy. Studied epidemiology, journalism and social policy with a focus on predictive modeling of infectious disease epidemics.
Advised by Bryan Grenfell and Tiffany Bogich.

Publications

Awards

- | | |
|------|---|
| 2019 | Best Paper Honorable Mention Award, ACM CSCW |
| 2019 | Cornell University Information Science Department Fellowship - One-year doctoral fellowship awarded for exceptional preparation and promise (top 1.5% of applicants). |
| 2017 | Cornell Tech Merit Scholarship - Two-year merit award for Master's-level study. |
| 2014 | Princeton University Department of Ecology & Evolutionary Biology Senior Thesis Award - Mathematical Modeling |
| 2014 | Society of Sigma Xi (scientific research honor society), Princeton University |
| 2010 | Valedictorian, Harpeth Hall School |

Current Research

Understanding patient-therapist rapport in online psychotherapy

PIs: Tanzeem Choudhury, Ph.D. (Cornell Tech) and Cristian Danescu-Niculescu-Mizil, Ph.D. (Cornell University)

- Using generative modeling techniques in natural language processing to understand rapport between patients and therapists on a widely used platform for text-based psychotherapy.

Understanding online abuser communities in intimate partner surveillance (IPS)

PIs: Nicola Dell, Ph.D. and Thomas Ristenpart, Ph.D. (Cornell Tech)

- Built a longitudinal web scraping pipeline for collecting data from online forums where abusers share tips on how to enact IPS.
- Co-authored paper analyzing data for insights into the specific tactics recommended, as well as the social dynamics of how these online spaces encourage would-be abusers [1].

Clinical computer security for victims and survivors of IPV

PIs: Nicola Dell, Ph.D. and Thomas Ristenpart, Ph.D. (Cornell Tech)

- Conducting a field study of a "tech clinic" intervention for victims of IPV in New York City, in partnership with the Mayor's Office to End Domestic and Gender-Based Violence.
- Co-authored paper contextualizing resultant learnings in the broader literature on technology for social justice and computer-supported consultative work [3].

Community-engaged technology design to support home health aides caring for adults with heart failure

PIs: Nicola Dell, Ph.D. (Cornell Tech), Madeline Sterling, M.D. M.P.H. (Weill Cornell Medicine)

- Performed qualitative analysis of interviews with 50+ aides, nurses, physicians, social workers and agency leaders to understand the technology ecosystem around the home care of heart failure [2,4].
- Synthesized resulting themes into a functional prototype of a tablet-based tool for communication, data collection and decision support for HHAs in the field. Used the prototype in a participatory design study with HHAs, nurses, and other stakeholders to elicit ideas on how aides might be better empowered within home care work [1].

Past Research

Extracting family history from unstructured clinical notes

- Developed a combined rule-based and statistical model (LSTM-CRF) extracting family history information from unstructured text in patient information questionnaires.
- Awarded student travel grant to present at the OHNLP/BioCreativ workshop at ACM-BCB 2018.

Evaluating the usability of a personal data filtering interface

PI: Deborah Estrin, Ph.D. (Cornell Tech)

- Conducted a controlled experiment via Amazon Mechanical Turk HITs evaluating the usability of an interface for filtering sensitive data from a user's Google Takeout export, with the goal of providing sanitized personal data to researchers. [*in submission*]
- Performed semi-structured interviews to reveal usability and privacy issues around the tool.

Prototyping a tool for real-time smartphone-based mood tracking

PI: JP Pollak, Ph.D. (Cornell Tech)

- Performed a literature review assessing prior computational approaches to treating anxiety.
- Prototyped and tested an intensive computing tool building on the hardware interface of an iPhone for logging emotional states in real time.
- Performed observational studies and semi-structured interviews to investigate the usability and utility of the tool for managing subthreshold and generalized anxiety.

Modeling the dynamics of enterovirus-71 in Taiwan: An application of the TSIR model

PI: Bryan Grenfell, Ph.D. (Princeton University)

- Developed a time-series model predicting the impact of vaccination on enterovirus infection rates in Taiwan based on data from the Taiwanese CDC. [[poster](#)]
- Awarded departmental prize for excellence in mathematical modeling.

Teaching and Mentoring Experience

Weill Cornell Medical College, New York, NY

Guest Lecturer, HCPL 8101: Digital Health, Professor Deborah Estrin

Summer 2020

Tech for Caregivers: Changing care by centering home health aides through technology [[slides](#)]

Cornell Tech, New York, NY

Research Internship Supervisor, Cornell Tech Summer Intern Program

Summer 2020

Teaching Assistant, INFO 6940: Technology & Social Justice, Professor Nicola Dell

Spring 2020

Teaching Assistant, INFO 6410 / CS 5682: HCI & Design, Professor Nicola Dell

Fall 2019

Research Internship Supervisor, Technion + Cornell Tech Intern Program

Fall 2019

Grader, CS 5740: Natural Language Processing, Professor Yoav Artzi

Spring 2019

Lead Teaching Assistant, Product Studio, Professor Deborah Estrin

Fall 2018

Fullstack Academy, New York, NY

Software Engineering Teaching Fellow

Summer 2017

- Taught and mentored 80+ students at a selective software engineering bootcamp.
- Delivered 10-minute talk on inclusive design and web accessibility: <https://youtu.be/NQP8yg81KZ8>

Relevant Work Experience

Freelance Software Designer & Developer, New York, NY 2017 - present

- Designed and developed a recipe management tool for the Thomas Keller Restaurant Group.
- Developed a Chrome extension providing online news readers with articles from contrasting political viewpoints for civic media startup Bridge the Media.

Pfizer, Inc., New York, NY

Summer Associate

Summer 2018

- Led a team of UX researchers and technologists to synthesize user stories, product requirements and storyboards for a care navigation product addressing health disparities within the Welsh NHS.
- Interviewed domain experts on the feasibility of a consumer voice product for patient support.

Biomeme, Inc., Philadelphia, PA

Product & Business Development Associate

2014 - 2016

- Developed an at-home sexual health diagnostic for a national reproductive healthcare provider.
- Developed a point-of-care influenza diagnostic with a federal disease control agency, resulting in a pilot program in a clinic network in Nairobi, Kenya.
- Conducted UX studies to guide development of a consumer-facing tool for personal DNA analysis.

Oxford University Clinical Research Unit (OUCRU), Ho Chi Minh City, Vietnam

Research Intern

Summer 2013

- Conducted literature reviews, performed data analyses (R) and mapped patient enrollment (GIS, Illustrator) for ongoing clinical studies at a tertiary tuberculosis hospital.
- Funded by the Center for Health & Wellbeing at Princeton University.

Doctors Without Borders / Medecins Sans Frontieres (MSF), New York, NY

Editorial & Multimedia Intern

Summer 2011, 2012

- As part of the Editorial team at MSF-USA, produced audio, video and web features highlighting MSF field staff at humanitarian aid sites worldwide.

The Daily Princetonian, Princeton, NJ

Managing Editor

2013 - 2014

- Led 100+ staff of a collegiate news organization publishing in print 5x/week and online 24/7.
- Built web and data journalism departments, and expanded the paper's multimedia capabilities.

Additional Leadership and Service

PhDs At Cornell Tech (PACT), 2020 Co-President

Elected to co-lead the PhD students' association at Cornell Tech. Sets agenda for student initiatives, organizes and presides over PACT meetings, and represents Cornell Tech PhD student interests to the school administration and broader University assemblies.

HealthTech.NYC, 2018-19 Co-Organizer

Curated a speaker series for engineers, designers, and clinicians in the NYC health tech ecosystem.

Venture for America, 2014 Fellow

Elected to the 2016-17 Alumni Board to support programs widening access to entrepreneurship.

Skills

- **Human-Centered Design** | Interviewing, contextual enquiry, survey design, thematic analysis, prototyping (Sketch, Photoshop, Illustrator, InDesign, InVision)
- **Data Science** | Quantitative analysis and statistical modeling (Python, R, MATLAB), modern machine learning (scikit-learn, Dynet, Tensorflow, Pytorch)
- **Software Development** | Full-stack software engineering (JavaScript, Node.JS, React, HTML, CSS/Sass), Agile development, cloud deployment tools (AWS, Heroku)
- **Communication** | Writing, editing, public speaking, multimedia production (audio and video)
- **Research** | Literature review, study protocol design, IRB submission, paper-writing
